Professor Joshua Lederberg  
Department of Genetics  
School of Medicine  
Stanford University  
Palo Alto, California 93405

Dear Josh:

"A pathologist does not a geneticist make."

I made that up myself, but I think it's pretty good.

What about this doctor in Hartford? It has been my understanding that first cousins can safely marry. My physician friends have told me for years that the children of first cousins are no nuttier than the kids of non-related parents.

Please, Josh, a sentence or two from you?

Warm regards,

EFL/sk
